Experience

MAQ Software   March 2021 - Present

Associate Software Engineer

- Owned complete features from gathering information to handling deployment to the production
- Turned Figma mockups to performant functional components using React (with Typescript) and Tailwind CSS.
- Created several unit test cases with RTL and Jest to match the flow of actual users while using the application
- Code in C# to create several endpoints which were used throughout the application
- Wrote several stored procedures in SQL Server Management Studio for providing backend logic to various features

Education

Lovely Professional University   July 2018 - July 2022

Bachelor of Technology in Computer Science and Engineering
